## Professional Summary

Design-driven IT engineer with 9+ years of design background and production experience shipping data-critical internal tools for a PhilHealth-accredited Health Information Technology Provider whose systems serve 2,000+ healthcare units nationwide. Rank 1 Overall IT Graduate at PUPSJ (Magna Cum Laude, GPA 1.2), combining React/Tailwind frontend development, PHP/.NET full-stack depth, QA-minded validation of 50,000+ record datasets, and UI/UX judgment.

## Education

**Polytechnic University of the Philippines - San Juan** — San Juan City, Metro Manila
*Bachelor of Science in Information Technology, Magna Cum Laude* — *Sept. 2026 (GPA: 1.2)*

- Rank 1, Overall IT Graduate; Rank 3, Overall Campus
- Consistent President's & Dean's Lister Awardee; Public Service Award; Best Capstone; Junior Programmer of the Year
- Relevant coursework: Data Structures & Algorithms, Operating Systems, Software Design

## Work & Leadership Experience

**Software Developer Intern** — Feb. 2026 – May 2026
*Eurolink Network International Corporation* — *Pasig City, Ortigas*

- Shipped production-grade internal tools for the ENIC MIS suite on a .NET stack at one of only seven PhilHealth-accredited Health Information Technology Providers (HITPs) in the Philippines, whose Easy Claims system processes transactions for 2,000+ healthcare units nationwide
- PhilHealth Easy Claims XML Data Cleaning Tool: built a web-native tool to extract, validate, and clean hospital claims data (50,000+ rows per run) affecting hospital reimbursement; diagnosed and resolved a critical Chromium memory overflow through binary-level optimisation and browser thread management, achieving zero-lag performance at scale with strict accuracy on financial data
- Collaborative Notes Module: architected and functionally tested the interface for a real-time, Notion-style multi-user notes system (RBAC, live per-user caret indicators, optimised file uploads) built on Tiptap, Yjs, and SignalR - reduced cross-department communication friction for announcements, team notes, and shared documentation
- Worked in Agile sprints managed in Jira with daily standups for progress reporting; wrote end-to-end tests with Playwright and Vitest to cover new features and catch regressions before release

**Graphic Designer** — Aug. 2025 – Present
*PUPSJ Student Council - Marketing & Publicity Committee* — *San Juan City, Metro Manila*

- Core visual designer for the student council marketing arm, delivering branding, social media graphics, and print designs for university-wide campaigns

**Accreditation Software Developer (Volunteer)** — July 2023 – July 2026
*Polytechnic University of the Philippines - San Juan* — *San Juan City, Metro Manila*

- Provided full-stack development and technical support for the university's digital accreditation system in coordination with the Quality Assurance Office; diagnosed and resolved system issues, streamlined document management workflows, and reduced manual processing during evaluation cycles

**Vice President for Communications & Head of Creatives** — Sept. 2022 – Aug. 2025
*GLITCH - PUPSJ Information Technology Academic Organization* — *San Juan City, Metro Manila*

- Directed communication strategy and technical execution for 3 consecutive years, managing a creative team and overseeing organization-wide events and digital campaigns

**Graphic Designer (Freelance)** — Nov. 2020 – Oct. 2022
*Independent* — *Metro Manila*

- Designed brand assets, marketing layouts, and print/digital materials for independent clients across varied industries

## Selected Projects & Competitions

**PUPSJ-CON: Accreditation Management System** | *Laravel, PostgreSQL, Tailwind CSS* 2023 – 2026

- Project Manager, Developer & Lead UI/UX Designer - led a 5-member team building a full-stack accreditation platform, designing the UX and visual interface directly with the university QA Office; implemented RBAC, server-side search, and document management, digitizing a previously manual, paper-heavy institutional process

**University News & Publishing Platform** | *Next.js, TypeScript, Supabase, Tailwind CSS* 2026

- Building a university news publishing and blog platform on Next.js and Supabase; designed the Postgres schema and managed schema migrations, and implemented authentication, row-level security policies, and file storage
- Implemented live real-time content delivery through Supabase Realtime subscriptions, so published articles and edits reach readers without a page reload

**YAKAP System Brand Identity** | *Brand Identity, Typography, Figma* May 2026

- Lead Brand & Visual Designer - designed two competing comprehensive visual identity systems and typography guidelines for a new PhilHealth-integrated partner platform, forwarded to executive leadership for final review

**Project V: Vaccine Management System** | *Java, PHP, MySQL* Sept. 2021 – Feb. 2022

- Built a Java desktop application with a PHP backend and MySQL database to address COVID-19 vaccine tracking inefficiencies; awarded "Top 1 Best Project" out of the bootcamp cohort at Asia Pacific College

**Trend Micro Capture The Flag (CTF) Philippines** | *Linux Exploitation & Defense* Oct. 2025

- Ranked 80th nationwide in a cybersecurity systems-exploitation and defensive security competition against university and professional teams (Linux cases)

**AWS Cloud Club PUP Solar Power Hackathon** | *Cloud Infrastructure* July 2025

- Collaborated on cloud infrastructure planning and technical workshops as part of Team TLP

## Skills & Certifications

**Languages**: Python, C#, PHP, TypeScript, JavaScript, Java, C++ (coursework), SQL (PostgreSQL, MySQL, SQL Server)
**Frameworks & Frontend**: React, Next.js, Node.js, Tailwind CSS, ASP.NET Core (.NET 10), HTML/CSS, Laravel
**Backend & Data**: Supabase (Postgres, row-level security, migrations, Auth, Storage, Realtime), PostgreSQL, MySQL, SQL Server, REST API integration
**Testing & Quality**: Unit testing, end-to-end testing (Playwright, Vitest), manual & exploratory testing, boundary/edge-case testing, defect diagnosis & reporting, data integrity checks on 50,000+ record sets, REST/API validation, XML/JSON processing
**Methodologies**: Agile/Scrum (Jira sprints, daily standups), code review, CI/CD, Git version control
**Documentation**: module documentation, user guides, code comments, defect reports
**IDEs**: Visual Studio, VS Code
**Agentic AI & Tooling**: Multi-agent orchestration (OpenCode agent harness, orchestration plugin, subagent delegation); custom skill modules for prompt/procedure design; MCP (Model Context Protocol) servers for knowledge retrieval and persistent memory; prompt engineering; model APIs (OpenAI GPT, Anthropic Claude, Google Gemini, DeepSeek, Kimi, Mimo)
**Automation & Integrations**: Python for AI/LLM tooling; Google Apps Script & Google Workspace; Google Sheets as a data layer; REST API integration; JSON/XML parsing; workflow automation
**CRM**: Salesforce (3-month supported virtual internship)
**Design & Prototyping**: Figma, Adobe Photoshop (9+ years), Illustrator, Affinity, Canva, After Effects, Blender, Wireframing, User-Centered Design, Brand Identity
**Tools & Systems**: Git, Docker, Linux (Debian 13, RHEL, Arch), Windows Server, Windows 11, Office 365 administration, Sway Window Manager
**Networking & Security**: Cisco networks, Fortinet, firewalls
**Certifications**: Lean Six Sigma Yellow Belt (Oct 2025); Fortinet Certified Associate in Cybersecurity; Fortinet FortiGate 7.6 Operator; Cisco Cyber Threat Management (2025); DTI Graphic Design for SMB & Marketing (2026)
